DETAILED ACTION

Response to Arguments

1. Applicant's arguments in light of the amendment, filed 04/15/08, with respect to claims 1,3,4,11-14 and 20 have been fully considered and are persuasive. The rejection of claims 1,3,4,11-14 and 20 has been withdrawn.

Drawings

2. The drawings are objected to because the numeral labels have no corresponding textual label. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 1,3,4,11-14 and 20 are objected to because of the following informalities: The preamble should start off with the article "A" or "The". Appropriate correction is required.

4. Claims 5-10,15,16 and 21 are under withdrawn status and need to be cancelled before the entire application can be allowable.

Allowable Subject Matter

5. Claims 1,3,4,11-14 and 20 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (*claims 1,4,11 and 13*), particularly a method of delivering data from a data input to a data output within a system and the details of selecting a system performance parameter from a group consisting of latency, bandwidth and safety, to be optimized in a system that allows data to be delivered in at least three different modes corresponding to the selected system performance parameter.

Conclusion

6. This application is in condition for allowance except for the following formal matters: Claim and drawing objections.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
